Things to consider as you make your Garden Plan

- ✚ What Do I Want to Grow?
- ✚ What Kind of Room Do I Have in a 12 x 12 Plot?
- ✚ Planning for Places to Walk Around Within the Plot
- ✚ Planning for Harvest Time
 - Cabbages are done early leaving room for cucumbers to spread
 - Radishes are done early leaving room for carrots and beets
 - Plant lettuce between tomatoes while tomatoes are small and harvest lettuce before tomatoes get big and block the light and take all of the water.
- ✚ Plant marigolds SOMEWHERE. They help the soil and deter the insects.
- ✚ Plant basil somewhere. You can harvest it all season.
- ✚ Plant cucumbers to climb up a trellis.
- ✚ Cut off or move and retrain plants that grow into the common path. Let them trail into cabbage area after you harvest the cabbage.
