

Access to the CCR&R Data Base

The Child Care Resource and Referral Data Base, Care Finder, maintains information on Child Care providers in Umatilla and Morrow Counties. This information consists of provider-s criteria for the child care they can provide. Parent information is also included in the data base when the family is using a CCR&R provider. Only information necessary to provide the requested services will be collected. Information on families using CCR&R will be kept confidential.

All information collected for the data base on each individual family or provider is the property of Umatilla Morrow Head Start, Inc., but shall be available to parents and providers in a timely manner. Parents and providers may request information kept in the data base be changed to better reflect the family or provider situation. The information is updated quarterly.

Access to the data base is done through the CCR&R Parent-Provider Consultant or the CCR&R Director or their delegate. Parents are provided information to choose a child care provider who will match their needs. State, community and local agencies who have a valid need for child care statistics or listing of providers (name, address, and telephone number) can obtain this information upon written request, i.e. list of providers for Health Department to follow up on immunization requirements. No individual or agency may obtain information from the data base for the purpose of selling products or materials.

All requests for information will go to the CCR&R Director who will provide the information, when appropriate, or offer an alternative to the individual, organization or agency to get information to providers and/or parents. Written request must address reason for obtaining information and also include how, when and where the information will be used.
